THE WRANGLER LIMITED

RACE WRANGLER®

Whether you are planning a new shed or improving an existing one, a Wrangler is essential equipment for every farm.

Hooves are a breeze in the Wrangler - the cow can't kick or go down - allowing you total access to treat front or back hooves. Calving cows is made easier too as the cow can't go down. You will find your Race Wrangler invaluable for all handling jobs including re-tagging, examinations, liver biopsies, and caesarians. In fact you'll wonder how you ever did without your Race Wrangler.®
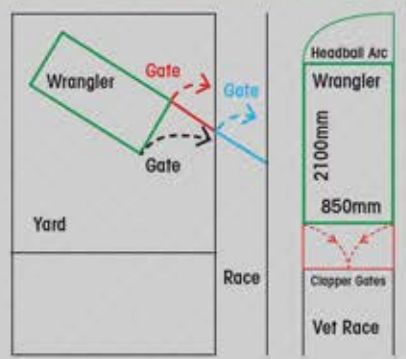

How it works

The double belly straps hold the cow, immobilising and relaxing her, and preventing her from 'going down' and breaking a hip during treatment.

The back hoof is then secured to a supporting bar leaving the operator with both hands free and out of the way of the knife. The front hoof is winched onto a wooden cradle and held securely with a rope.

- Rear closing headbail gate.
- Rump chain.
- Braked belly winch 25:1 geared.
- 100mm underbelly girths.
- Back leg winch, rope and guide bar with three height settings.
- Economy kwilla front foot supports.
- Removeable sidebars on left flank.

Race

Installation
Fix in place with dynabolts or pour concrete through floor frame.

Optional extras

Removable sidebars on Right Flank

Calving Attachment
Use with existing Wrangler backleg winch to assist cows during calving.

Walk Thru Headbail
Headbail closes from behind cow. When finished, pull lever which releases both yokes allowing cow to exit through the headbail.

Braked Leg Winch
Backleg winch to braked 4.5:1 stainless steel winch for added control and safety when lowering leg. Essential when safety is a factor.

Winched Foot Front Support
Winched, double-locking front foot supports with removeable handles.

Wooden Floor
To enable Wrangler to freestand

Matting
More grip for cow will make her more sure-footed and stand better.
- Diamond Grip Rubbermat
- FRP Green Grating
