PRO WRANGLER®

THE WRANGLER
LIMITED

The Pro Wrangler® has all the bells and whistles for vets, hoof care professionals, or serious farmers to tackle any treatment.

Professional tools for professional hoof care

Arriving on farm with a Pro Wrangler®, you will be set to treat cows in complete safety and hassle free ease.

Treat front & back hooves quickly and easily. Securely hold cows for calvings and caesarians - with suspension, lights and road tyres the Pro Wrangler is vital for hassle free examination of all dairy cows.

Fully kitted-out with equipment, the Pro also has duratorque suspension and 12" rims, registration and light bar for smooth towing anywhere. Simply drop the wheels, remove the tow bar and lights and you are ready for action.

Pro Wrangler®

Race Wrangler

- Removeable drop down wheels.
- Removeable drawbar.
- Removable sidebars on right flank.
- Jockey wheel.
- Registration bar with lights.
- Swing gates.

How it works

The double belly straps hold the cow, immobilising and relaxing her, and preventing her from 'going down' and breaking a hip during treatment. The back hoof is then winched to a supporting bar leaving the operator with both hands free and out of the way of the knife. The front hoof is winched onto a wooden cradle and held securely with a second rope.

Operations can be performed by removing the right or left side bars, whilst using one or two of the belly straps to prevent the cow from falling. When finished, the Pro can be road ready again by attaching the towbar, lights, and raising the Wrangler onto its wheels.
